

Technical Data Sheet

EV2000

Description

- EV2000 is a MAGRAM absorber, that uses a modified polyethylene co-polymer thermoplastic elastomer.
- Provides ultimate flexibility and designed for attenuation over a wide range, particularly above 3 GHz.
- This part is ideal as a near-field absorber/suppressor in electronic enclosures and assemblies.
- Product performance can be tailored to specific applications.
- This product is supplied in pellet form for cable extrusion.
- Halogen free, RoHS and REACH compliant.

Permeability and Permittivity

Attenuation

Note: the information provided above is accurate at time of publication. It is the responsibility of the end-user to confirm compliance to their application. All test data is typical.
